Gentlemen:

I am Forteen years old and I am reporting something which I saw about a month ago. about nine thirty my friend and I were looking at the constellations when we saw a glowing object moveing across the sky. All of a sudden it seemed to blow up, and a bright glear came from it. From the glear came a white cloud, but finally dispersed. I would like to know what it could have been.

Also I would like to report that I have seen a few "Unidentefied Flying objects" around my town.

My friends and I are all interested in the"U.F.O. Arieal Phenomonia" and " Project Blue Book". We are always looking up at the sky for U.F.O.'s

Today I saw a true move on U.F.O.s and I saw films of sightings. They said that they do exist. I want your true opinion on what they are. The ones I saw had a blueish-green light and they seemed to be staying near the towers which are near my house.

Another thing I would like to know is if you have any idea were they come from. I have tried to fiend that out but the onley logeical place is "Mars". I havefound out that Mars has a thin atmosphere.

I would like all the information onU.F.O. as possible.

THANK YOU
